kyoin@jsk.t.u-tokyo.ac.jp へ課題をメール

Subject: エージェントシステム課題2回目

本文に 所属専攻 研究室 学生証番号 氏名 を記述して、pdfを添付で上記メールアドレスへ送信

適宜ビデオ、ソースコード等も添付のこと。 github上で Pull Requestしてもらえるとさらに良い

締め切り: 7月10日講義まで

エージェントシステム 課題3回目 3rd Assignment https://github.com/agent-system/lecture2019

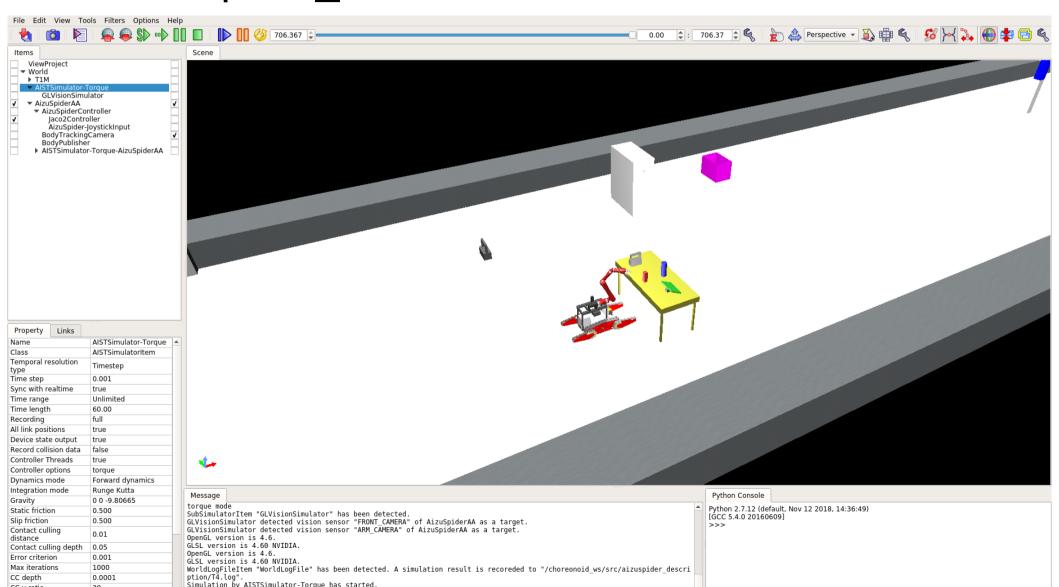

- Using robot: AizuSpider or JAXON or AizuSpiderWheel (you can use at least one robot)
 - Pick all objects on the floor and the table, then Put objects into Trash Box
 - Using recognition programs for detecting objects

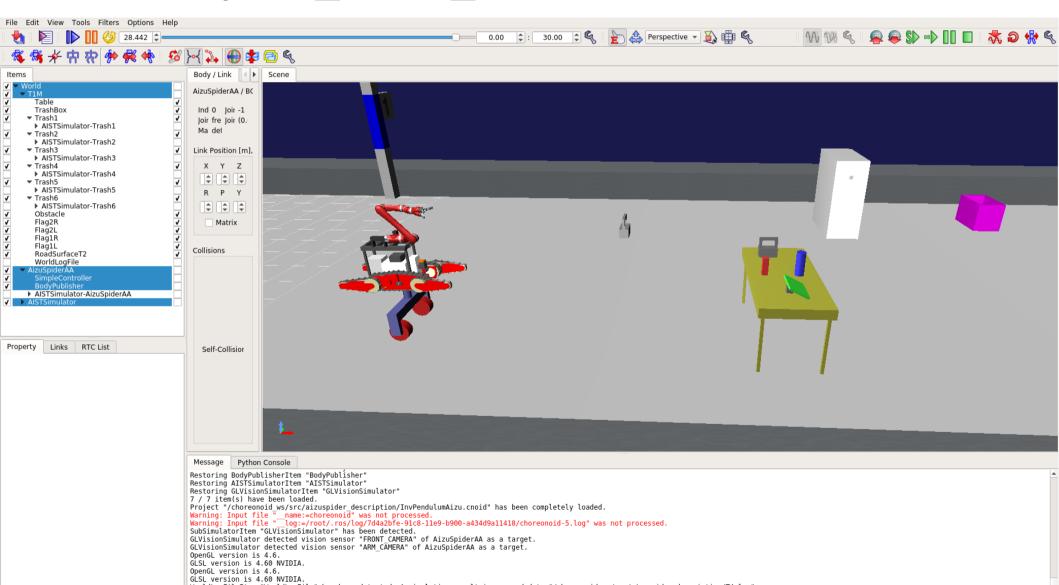

Advanced:

- Using two AizuSpiders for cooperative work
- Completely autonomous executing the task
- Use the same program for the different robot
- Update control algorithm of two-wheel inverted pendulum
- Create your original task and environment and solve it

 \$./run.sh roslaunch aizuspider_description aizuspider_task2.launch

 \$./run.sh roslaunch aizuspider_description aizuspider_wheel_task2.launch

 ./run.sh rtmlaunch hrpsys_choreonoid_tutorials create_environment_sample.launch ROBOT_SETTING_YAML:=/choreonoid_ws/src/aizuspider_des cription/jaxon_task2.yaml
